

Oregon has over
1.2 million
children and
young adults
under 25

#48

OREGON IS ONE OF THE WORST STATES

for getting kids at least one preventative dental visit during the year (in 2013).

1/2

OF CHILDREN 6-9 YEARS OLD

have already had a cavity (2012 Smile Survey).

99%

OF ORAL DISEASE IS PREVENTABLE

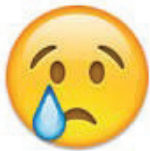

and the cost of prevention is far lower than the cost of treatment.

1/5

OF CHILDREN 6-9 YEARS OLD

had untreated decay and over 17,000 had rampant decay of 7 or more teeth.

We can change this and you can help. Make a difference in a child's life by becoming an **ORAL HEALTH CHAMPION.**

UNTREATED TOOTH DECAY

seriously affects a child's ability to learn and thrive and may result in the following:

- Pain and discomfort
- Poor eating / nutrition
- Lower self-esteem
- Poorer sleep patterns
- Missed school days
- Lower achievement / grades
- Reduced social interaction
- Employment barrier for young adults

KEMPLE CHANGES LIVES

Through our Screen & Seal and On-site Clinics we do the following:

- Screen for decay
- Educate on proper brushing & flossing techniques
- Provide oral hygiene kit with toothbrush, toothpaste and floss
- Provide acute treatments through our network of volunteer dentists
- Apply dental fluoride varnish
- Apply dental sealants to permanent molars

OUR MISSION

We improve the health and well-being of children in Central Oregon by providing critical preventative, educational and dental treatment services for children and young adults whose families cannot access basic dental care.

We do this through our dental clinic facility as well as portable screen and seal program events at local schools and community partner organization venues, with subsequent follow-up and referrals to volunteer dental professionals as needed.

We provide portable preventative dental services to children and young adults (age 3 to 25) regardless of insurability at various convenient locations. Kemple Clinic advocates for all children in need of timely, high quality dental care.
